

Case Study: Large Commercial Cleaner

Higher performance & productivity gains!

Overview

This large global FM is responsible for several sectors including but not limited to Health, property, mining, industrial, food etc they are constantly looking for innovative ways to improve outcomes for their client whilst improving productivity to enhance profitability.

A major driver for their Facility management and cleaning teams is performance and sustainability. Its important to align with the clients environmental targets but also a priority to maintain a safe and productive work place for staff, of which they manage thousand across the country.

The Challenge

Like all high traffic environments, scale buildup in toilets is very common, both above and below the water line. This looks dirty and therefore its important that it is taken care of, often taking much labour time and effort to scrub this scale away. Harsh chemicals and repeated scrubby has a negative effect on the toilet over time and its unpleasant and time consuming for the cleaning staff.

It was recommended that the cleaners apply Thrives Toilet Cleaner to the effected areas. With is thick formulation and long cling time, the application is fast, easy and efficient with limited scrubbing and labour effort required.

Within days the team saw fantastic results.

It was important for the products to be non-toxic and safe to use for the cleaning staff.

The Solution

Experience the power of **Toilet Cleaner** – the world's first formulation that uses bacteria to digest scale at the source eliminating bad odours, stains and reducing the time to clean.

Within a few days they noticed a significant reduction in scale stains and odour in their washrooms. Cleaners saved valuable time cleaning the washrooms, enjoyed using the all natural products and produced a better outcome for the client and tenants.

Using Toilet cleaner will allow the Cleaning company:

Improve safety for staff by reducing the use of harsh chemicals, reduce CO2 footprint and:

- Reduce single-use plastics
- Stop using harsh, toxic chemicals
- Improve productivity
- Maintain alignment with Sustainability commitments
- Provide their customers with a clean and hygienic washroom experience

About Thrive

Thrive believes cleaning can be smarter, safer, and better for the planet.

We develop innovative, science-backed biological solutions to tackle the challenges of human-made pollution.

Our groundbreaking products transform how people clean—delivering exceptional performance without compromise. By setting new standards in sustainability, we empower businesses to reduce waste, improve efficiency, stay compliant, and shrink their carbon footprint – all while supporting the regeneration of our planet's ecosystems.
