

SLUDGEZAP

For drains, pipes & septic tanks

What makes it different?

- SLUDGEZAP is a soluble granulated treatment that eliminates organic waste, the primary causes of foul odours in septic tanks and wastewater systems. It also eliminates unpleasant odours and blockages impacting sinks, showers, toilets, baths, and sluices.
- Suspended solids (TSS), organic content (TOC) and oxygen demand (BOD, COD) of septic tanks and wastewater are reduced through combined enzymatic and microbial modes of action. It also contains cellulase that biodegrades toilet papers.
- Odours generated by anaerobic (oxygen-depleted) conditions and bacteria are eliminated. It reduces the requirement to frequently pump out septic tanks, reduces blockages and removes foul odours and keeps pipes flowing freely.
- SLUDGEZAP is a concentrated, flexible, sustainable product, powerful enough to remedy legacy problems and long-lasting for regular preventative maintenance.

Septic Tank Indicative Guide

Septic tank capacity (people served)	Reactive or after cleaning	Maintenance dosage (monthly)
1-4	1 x 30 g scoop per day for 4 days	1 x 30 g scoop
5-10	2 x 30 g scoop per day for 4 days	2 x 30 g scoop
11-20	4 x 30 g scoop per day for 4 days	4 x 30 g scoop

Dosage Guide

Asset	Legacy build-up (daily)	Maintenance (weekly)
Kitchen sinks	1 x 25 g scoop	1 x 25 g scoop
Floor drains	2 x 25 g scoops	2 x 25 g scoops
Grease traps: <200L	2 x 25 g scoops	2 x 25 g scoops
	>200L	1 scoop per 100 L
Wet wells & lift stations: < 1 m ³ / min	100 g per m ³ /min	100 g per m ³ /min
	> 10 m ³ / min	1 kg per 10 m ³ /min

Usage Instructions

Pour SLUDGEZAP granules directly into the septic tank, wastewater or drain (and rinse slowly with sufficient water)

Repeat dosing:

- daily for legacy problems and severe buildup
- or weekly for maintenance and continuous protection
