

Case Study: International Hotel

Eliminating stubborn limescale build-up

Overview

- Located in the Sydney CBD
- Over 90% annual occupancy
- The hotel has over 600 rooms

The Challenge

- Persistent and recurring limescale and body fat buildup in the grout in showers
- Current cleaning methods and products proving ineffective in fully removing or preventing the build up
- Compromising overall hygiene and cleanliness of bathrooms, affecting user experience
- Increasing maintenance costs and cleaning time due to the need for frequent interventions.

The Benefits

- Works within 24 hours
- Outperforms corrosive cleaning chemicals
- Eliminates scale build up with limited labour intervention
- No intense scrubbing needed
- Maintains infrastructure integrity

The Solution

- After two applications of SCALEZAP and All purpose cleaner, the presence of limescale & body fats was eliminated from the shower floors
- SCALEZAP & APC utilise powerful organic agents that penetrate and dissolve limescale deposits, significantly reducing the need for excessive scrubbing or repeated applications

Industry

Hotels and Resorts

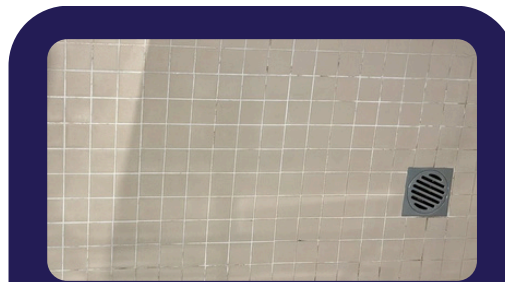

Location

Sydney CBD

Before:

Stubborn limescale and body fat build-up, resistant to traditional cleaning methods and looks unsightly

After:

After two applications all limescale is gone and shower floor is left fresh and clean
