

Case Study: Paddington Inn

Eliminating foul washroom odours

Overview

A neighbourhood pub since 1814. We are all about celebrating life's pleasures – great food, delicious drinks, and live music shared with the company of friends and family. Come and watch Paddo life go by from our huge windows.

A popular spot all year round, however, overflows with patrons when the sporting events and concerts run at the Allianz Stadium and SCG, which is almost a weekly affair.

The Challenge

Home to il Baretto, with their full servicing restaurant out back and a bustling street hugging bar in the front, this is one of the most popular casual dining spots on the bustling Oxford Street, Paddington.

Right in the middle of the venue is the male bathrooms and like most 5 man troughs, the uric scale build up in the drain pipe is significant and emits a foul odour that cannot be removed. High water flush, deodorisers, urinal screens and acid rinses, have all been applied to remove these foul odours, without success.

“We are able to dramatically reduce the water flush, remove urinal screens and maintain a very busy male washroom with limited bad odour. Thanks Thrive ”

Sam, General Manager, The Paddo Inn

Before:

Slogged urinal that caused pungent odours

After:

Clear and odour free, no manual work required

The Solution

Experience the power of **URIZAP** – the world's first formulation that uses bacteria to digest uric scale.

The Golden Sheaf implemented **URIZAP**, and within just three weeks, they noticed a significant reduction in uric scale and odour in their washrooms. But it didn't stop there – by six weeks, the odour was nearly eliminated, and the uric scale within the pipework was drastically reduced.

Using URIZAP, The Golden Sheaf:

Are confident they will save meaningful litres of water, CO2 and unnecessary costs per year and will:

- Reduce single-use plastics
- Stop using harsh, toxic chemicals
- Reduce callouts
- Maintain alignment with Sustainable Restaurant Association (SRA) commitments
- Provide their customers with a clean and hygienic washroom experience

About Thrive

Thrive believes cleaning can be smarter, safer, and better for the planet.

We develop innovative, science-backed biological solutions to tackle the challenges of human-made pollution.

Our groundbreaking products transform how people clean—delivering exceptional performance without compromise. By setting new standards in sustainability, we empower businesses to reduce waste, improve efficiency, stay compliant, and shrink their carbon footprint – all while supporting the regeneration of our planet's ecosystems.
