

Case Study: Local Pub

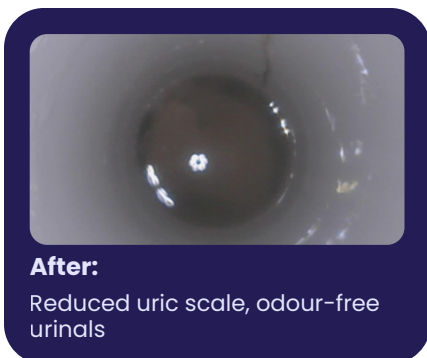

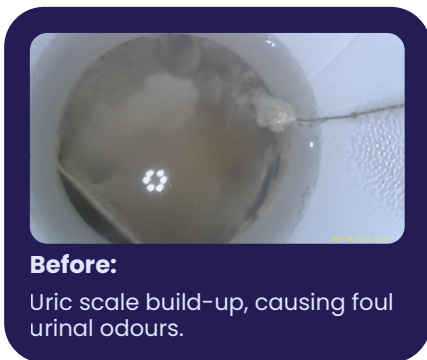

Achieving odour free pub urinals

Overview

- Busy pub and hotel based in North West England catering to tourists and locals.
- Facilities managed internally.

The Challenge

- Persistent urinal odour in the men's washroom at the Pub.
- Regular maintenance including monthly call outs to deal with ongoing odour issues.

The Solution

- 14-day use of **URIZAP Shock**.
- Significant odour reduction noticed by staff within one week.
- The Site manager was very impressed at the reduction in odours.
- Now moving to ongoing preventative dosing using **URIZAP**.

The Benefits

- Resolved issues quickly.
- Odour-free washrooms and improved user experience.
- Reduced manual intervention.
- No need for harsh chemicals or disruptive maintenance.

"The urinals are the best they have ever been. No smell!"

We usually change the extraction due to smell but since the trial began, no extraction has been changed"
