

Case Study: Netherhall Learning Campus URIZAP and SCALEZAP 360 Foam in action

Overview

Netherhall Learning Campus, located in Rawthorpe, Huddersfield, England, is a comprehensive educational federation comprising four schools.

Established in 2008, the campus includes Netherhall St. James Infant & Nursery School, Netherhall Junior School, Netherhall High School, and the Creative and Media Studio School.

This unified campus structure allows for a seamless educational journey from early years through to secondary education, fostering a cohesive learning environment for all students.

The Challenge

Netherhall faced significant challenges in maintaining the hygiene and ambiance of their boy's washroom, persistent problems with unpleasant odours and slow-draining urinals.

These issues created a noticeable stench detectable from the corridor, requiring the bathroom window to be kept open constantly. This situation also posed a potential hygiene risk, making it imperative for the school to find an effective solution to reduce odours and improve the washroom's overall condition.

“After just three weeks of using URIZAP and SCALEZAP 360 Foam, we noticed a big improvement in odour in the male toilets.

Both products have exceeded our expectations, with the SCALEZAP 360 Foam dramatically improving the taps but removing stubborn limescale.”

The Solution

At the suggestion of their facilities manager, Dalkia, they sourced products from Lyreco, a trusted distributor of cleaning and maintenance solutions. By implementing Thrive's products; URIZAP and SCALEZAP 360 Foam, Netherhall was able to address and resolve their specific issues in the boy's washroom, which featured a metal trough with four urinals.

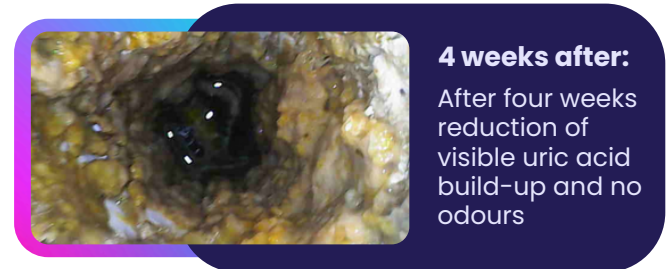

URIZAP is designed to eliminate the root causes of blockages and odours in urinals, ensuring that urinals remain free-flowing and odour-free.

SCALEZAP 360 Foam is a powerful surface cleaner that effectively removes limescale deposits and stains from urinal exteriors and other washroom surfaces, contributing to an overall an improved washroom experience.

The Benefits

The implementation of URIZAP and the SCALEZAP 360 Foam spray resulted in significant improvements:

-  **Odour reduction:** The primary focus was to eliminate the strong odours emanating from the urinals. The use of URIZAP directly addressed this issue by removing the underlying cause of the smell inside the pipework, and the SCALEZAP 360 Foam ensured the surface remained clean and free from stains
-  **Free-flowing troughs:** URIZAP eliminated legacy build-up, ensuring effective drainage and eliminating odours.
-  **Sparkling clean surfaces:** The SCALEZAP 360 Foam ensured that the urinal exterior remained clean and free from limescale and stains. Moreover, it removed stubborn limescale from the sink taps and other washroom surfaces.

About Thrive

Thrive believes cleaning can be smarter, safer, and better for the planet.

We develop innovative, science-backed biological solutions to tackle the challenges of human-made pollution.

Our groundbreaking products transform how people clean—delivering exceptional performance without compromise. By setting new standards in sustainability, we empower businesses to reduce waste, improve efficiency, stay compliant, and shrink their carbon footprint - all while supporting the regeneration of our planet's ecosystems.

Biotech that cleans, clears & restores
